

# Point Strobe

## Overview

**Point Strobe** is an ultra-small strobe powered by a 10W lamp with a flash rate of 1-10 flashes per second. Its strong plastic case makes it ideal for mobile use and provides easy setup thanks to its analog operation. The unit ships with built-in overheat protection and high voltage protection.

## Specifications

### Source & Optics

Light Source: ST-006

### Effects & Functions

Strobe effect: 1 flash per 1-3 seconds

### Control

Operational mode: Plug & Play

### Electrical

Input voltage range: AC100–240V,  
50–60Hz  
Power consumption: 10W

### Physical

Two versions: Screw-in and Plug-in  
Plastic case  
Dimensions: 110x25 mm. / 4.3x1 in.  
Weight: 0.05 Kg. / 0.11 Lbs.
